THE COMPANY

QCS' client is a professional organization and a trusted source for DOT/Transportation, OSHA/Workplace Safety, Human Resources, Construction Safety, Hazmat/Hazardous Materials regulation, and compliance products and services. The organization helps increase safety awareness, reduce risk, follow best practices, improve safety training, and stay current with changing regulations.

THE CHALLENGE

The company had 2 primary goals:

01

Expand the capacity of their sales team

02

Benchmark existing vendors performance against a new team

THE SOLUTION

Some of the critical components of our B2B Lead Generation program included:

- Rather than place the business with 1 owner-operator, we opted to use multiple. This allowed us to build a champion vs. challenger model that drove a naturally competitive environment.
- QCS has been able to target the wireless subset of leads with our compliant non-ATDS calling system. Because it is illegal to call wireless numbers on an ATDS system without prior express written consent, this advantage has generated large amounts of prospect/customer revenue for our client that would have otherwise been lost.
- Efficiency and accuracy are important to the organization. Early in our relationship, they recognized how nimble, flexible, and precise our processes are. From testing new scripts to launching new products, the effectiveness and precision of our implementations have driven their decision for QCS to be their preferred new product and testing vendor.
- We have helped improve email accuracy by building a process to validate email addresses in real-time. This has considerably increased the opportunities for the organization's sales and marketing team.
- QCS has played an instrumental role in helping transition the organization's customers and prospects from print publications to an online subscription model.
